

Dear Valued RSG Customer,

The roofing products manufacturers have implemented another cost increase to distribution effective the beginning of July. This is the next in a series of increases reflecting increased asphalt and transportation costs that the manufacturers and the industry are facing.

Our commitment to our customers is to be transparent with you and be timely in giving you important information that directly affects your business - like rising costs.

We understand that the nature of your business necessitates quick and accurate information so you can bid projects and plan accordingly. Therefore, we want to inform you that sometime in July, RSG will be forced to pass along these manufacturer cost increases. Please contact your local RSG branch for details. We hope that this is the last of the increases for a while, but we will keep you updated regarding any further developments.

Additionally, the roofing material manufacturers have increased fuel surcharges by 100% or more in 2011. Therefore, increases in your RSG fuel/delivery surcharges may be forthcoming. Once again, please contact your local RSG branch for details.

There is a lot happening quickly, but we remain committed to providing you the best service in the industry as well as inform and assist. We appreciate your support and look forward to helping your business succeed in 2011. At RSG, our experts have you covered.

Sincerely,

Jeff Willis
